CONTENTS — TABLE DES MATIÈRES — INHALT

PAGE

BARKWORTH, H., and BATESON, MARY, An investigation into the bacteriology of top-soil dumps 345

BASARABA, JOSEPH, Influence of vegetable tannins on nitrification in soil 8

BECKETT, P. H. T., and WHITE, R. E., Studies on the phosphate potentials of soils. Part III. The pool of labile inorganic phosphate 253

BIRCH, H. F., *Short communication.* The effect of 2:4-dinitrophenol on phosphorus transformations during humus decomposition 391

CHAUDRI, I. I., SHAH, B. H., NAQVI, H., and MALLICK, I. A., Investigations on the role of *Suaeda fruticosa* Forsk in the reclamation of saline and alkaline soils in West Pakistan plains 1

COSGROVE, D. J., An examination of some possible sources of soil inositol phosphates 137

CROOKE, W. M., The measurement of the cation-exchange capacity of plant roots 43

ELGALA, ABDELMONEM M., and MAIER, R. H., Chemical forms of plant and soil iron as influenced by soil moisture . 201

EZEDINMA, F. O. C., *Short communication.* Notes on the distribution and effectiveness of cowpea Rhizobium in Nigerian soils 134

GARETH JONES, D., MUNRO, J. M. M., HUGHES, ROY, and ELLIS DAVIES, W., The contribution of white clover to a mixed upland sward. I. The effect of Rhizobium inoculation on the early development of white clover 63

GHONEIM, MOHAMED F., and MAIER, ROBERT H., Development and use of a short-term nutrient-absorption technique for evaluating soil magnesium status 213

GROSSBARD, E., and HALL, D. M., An investigation into the possible changes in the microbial population of soils stored at —15°C 317

JOHNSTON, HARRY H., The relationship of brown humus to lignin 191

KAFKAFI, U., HAGIN, J., ÖZUYGUR, M., TEZER, G., ATEŞALP, M., ELÇI, Ş., and ŞAPLAKOĞLU, A., Evaluation of available phosphorus in highly phosphorus-deficient soils 354

KHAN, D. H., and ROY, A. C., Study on the phosphate retention and release in some East Pakistan soils 365

KICK, H., SAUERBECK, D., and FÜHR, F., Die Aufnahme von Kohlendioxid durch die Pflanzenwurzel. I. Gegenwärtiger Stand des Problems und Vorschläge zu seiner experimentellen Lösung 303

KLIEWER, MARK, LOWE, RICHIE, MAYEUX, PATRICIA A., and EVANS, HAROLD J., A biological assay for cobalt using *Rhizobium meliloti* 153

LARSEN, SIGURD, The effect of phosphate application on manganese content of plants grown on neutral and alkaline soils 37

LEVIN, I., and NITSAN, J., *Short communication* Use of the Mitscherlich equation in designing factorial fertilizer field experiments to reduce the number of treatments 249

LOCKARD, R. G., and ASOMANING, E. J. A., Mineral nutrition of cacao (*Theobroma cacao* L.) I. Deficiency symptoms and nutrient levels in plants grown in sand culture 142

MACKENZIE, A. F., and AMER, S. A., Reactions of iron, aluminium and calcium phosphates in six Ontario soils . . 17

MADGWICK, H. A. I., The chemical composition of foliage as an index of nutritional status in red pine (*Pinus resinosa* Ait). 70

MENCE, MARGARET J., The differential mortality of *Trifolium repens* and *Phleum pratense* seedlings in relation to temperature. 113

NICHOLS, R., Studies on the major-element deficiencies of the pigeon pea (*Cajanus cajan*) in sand culture. I. Foliar symptoms of the major-element deficiencies 377

NYE, P. H., and GREENLAND, D. J., Changes in the soil after clearing tropical forest 101

PARR, J. F., and NORMAN, A. G., pH control in nitrate uptake studies with excised roots 185

PATE, J. S., and GREIG, J. M., Rhythmic fluctuations in the synthetic activities of the nodulated root of the legume . . 163

POWRIE, J. K., The effect of cobalt on the growth of young lucerne on a siliceous sand 81

SABET, S. A., ABDEL SALAM, M. A., and LAGERWERFF, J. V., Growth and ion uptake by maize seedlings on solutions variable in phosphate and flow rate 94

VAN SCHREVEN, D. A., The effect of some actinomycetes on rhizobia and *Agrobacterium radiobacter* 283

SEN GUPTA, M. B., and CORNFIELD, A. H., *Short communication.* Effect of four acidifying materials added to a calcareous soil on the availability of phosphorus to ryegrass . 388

ULRICH, B., and OBERLÄNDER, H. E., Theoretische Betrachtungen über die enzymkinetische Interpretation der Ionenaufnahme durch Pflanzen 26

VANČURA, V., Root exudates of plants. I. Analysis of root exudates of barley and wheat in their initial phases of growth 231

WARD, G. M., Greenhouse tomato nutrition – A growth analysis study 125

WIERINGA, K. T., The humification of high-moor peat. II. Soil micro-organisms decomposing aromatic compounds, and synthesis of complex humus-like substances 333

WILLIAMS, C. H., and STEINBERGS, the Late A., The evaluation of plant-available sulphur in soils. II. The availability of adsorbed and insoluble sulphates 50
